<https://www.kryptonitelock.com/en/products/product-information/current-key/005339.html?type=bicycle>

### Product

*What is different about the new KryptoLok 610 S Folding Lock?*

- **More compact lock size** easier to install and transport
- **New click bracket** offering higher ease of use & quality
- **Durable rubber coating on steel bars** protects bike frame
- Improved design with rivets **less “play” between bars and rattling**
- **Automatic dust shutter** easier to insert key into the cylinder
- **Stronger performance** Technical design update to increase mechanical attack resistance

*What EU certifications has the new KryptoLok 610 S received?*

- Varefakta and Sold Secure Bronze approved

*What are the product dimensions and weight of the KryptoLok 610 S?*

- Product dimensions: Length 100cm
- 5mm hardened steel bars and washers
- Product weight: 2.65 lbs

### Accessories

*Does the new KryptoLok 610 S come with the click tight bracket or is it sold separately?*

- It comes with **New click tight bracket** offering higher ease of use & quality

*What are the benefits of the New click tight bracket?*

- **Press functionality - quick and easy to release lock**
- **Audible “click” sound** – assurance that you can feel safe to start your ride
- In addition to the mechanical engagement noticeable by hand, there is further audible “click” when bracket arms are pressed together both reassuring the user that the lock is well retained during the ride
- **Insert & remove the lock – without hassle** (from top, front or side)
- The lock removal to the front essential for the common seat tube mount position on bikes where the top tube is quite close is even more convenient thanks to integrated tilt function.
- The design in lower bracket part ensures that the lock is guided in the right position during insertion no readjustment needed or risk that lock is touching the bracket arms
- No rattle noise during the ride

# KRYPTONITE<sup>®</sup>
